

Rejoice Teca

Final-Year Computer Science Student | Software Development

Windhoek, Namibia | Rejoice.teca@gmail.com | +264 81 2242642

LinkedIn: [Rejoice Teca](#) Github: [Rejoice-t](#)

Final-year Bachelor of Computer Science (Software Development) student at the Namibia University of Science and Technology (NUST), with international study experience at Riga Technical University, Latvia. I have practical experience developing software applications, REST APIs, databases, and AI-powered solutions using Python, Java, JavaScript, SQL, and FastAPI. Through academic projects, hackathons, international collaboration, and technology competitions, I have developed strong problem-solving, teamwork, and communication skills. I am seeking an internship opportunity to apply my technical knowledge, gain practical industry experience, and continue developing as a software professional.

EDUCATION

BACHELOR OF COMPUTER SCIENCE IN SOFTWARE DEVELOPMENT

Feb 2024 - PRESENT

Namibia University of Science and Technology (NUST)

Current Average: 66.7% | NQF Level 7

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Software Engineering, Systems Analysis & Design, Web Development, Mobile Application Development, Distributed Systems & Applications

EXCHANGE PROGRAMME

JAN 2026 - JUNE 2026

Riga Technical University, Latvia

Relevant Coursework: Artificial Intelligence, Natural Language Processing, Testing and Software Quality, Applied System Software

- Completed advanced Computer Science coursework in Artificial Intelligence, Natural Language Processing, Testing and Software Quality, and Applied System Software.
- Collaborated with students from diverse technical and cultural backgrounds, strengthening teamwork, communication, adaptability, and problem-solving skills.

TECHNICAL SKILLS

Artificial Intelligence & Data: Artificial Intelligence, Generative AI, Large Language Models (LLMs), LLM APIs, AI Application Development, Python, SQL, Data Integration

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, SDLC, Agile, Software Testing, Debugging

Programming: Python, Java, JavaScript, SQL, HTML, CSS

Backend & APIs: FastAPI, REST APIs, JSON, API Integration

Databases: MySQL, Microsoft SQL Server, Relational Database Design, SQL Queries

Development Tools: Git, GitHub, Swagger / FastAPI Documentation, Render, Vercel

PROJECT EXPERIENCE

SAVEFRIDGE AI Python | FastAPI | JavaScript | HTML | CSS | Groq API | Generative AI | REST APIs | JUNE 2026

- Independently developed and deployed a full-stack AI-powered application that generates recipe recommendations from user-provided ingredients using Python, FastAPI, JavaScript, and the Groq API.
- Integrated a large language model into the application through structured prompts and API interactions to generate recipe responses.
- Developed an interactive frontend with ingredient selection and dynamically generated recipe cards.
- Diagnosed and resolved API authentication and frontend-backend communication issues using FastAPI Swagger documentation and deployment logs.

- Implemented environment-variable and API-key management across Render and Vercel for secure deployment.

VISION — AI AGENT FOR SMART LIVESTOCK & GRAZING

JUL 2026

Deep Learning IndabaX Namibia 2026 Hackathon | **Python** | **FastAPI** | **Google Gemini** | **REST APIs** | **Git/GitHub** | **React**

- Developed an AI-powered livestock advisory prototype using Python, FastAPI, and Google Gemini to generate grazing recommendations.
- Designed REST API request and response structures to connect application inputs with AI-generated recommendations.
- Integrated weather and pasture information to incorporate environmental factors into grazing assessments.
- Collaborated with a multidisciplinary hackathon team using Git and GitHub to develop and demonstrate the prototype..

BANKING SIMULATION APPLICATION **Java** | **MySQL** | **Object-Oriented Programming** | **Database Design** | DEC 2024 - FEB 2025

- Collaborated in developing a Java-based banking simulation supporting account creation, deposits, withdrawals, and fund transfers.
- Designed and implemented a relational MySQL database for customer accounts, transaction records, and fund-transfer data.
- Applied object-oriented programming principles to structure application components and core banking functionality.
- Performed debugging, testing, and validation of core application functionality.

BANKING SIMULATION APPLICATION **HTML, CSS, JavaScript**

Jul 2026

- Developed a responsive website to showcase products and improve the customer browsing experience.
- Designed user-friendly web pages using HTML, CSS, and JavaScript.
- Implemented responsive layouts for desktop and mobile devices and improved website navigation and layout.

LEADERSHIP & INTERNATIONAL ACHIEVEMENTS

FIRST Global Robotics Challenge

Singapore,2023

- Represented Namibia in an international robotics competition by applying STEM and technology concepts to challenges addressing global issues.

FIRST Global Robotics Challenge

Athens, Greece, 2024

- Collaborated in multidisciplinary teams to design and program robotics solutions by applying technical problem-solving and teamwork in an international competitive environment.
